

earthTV launches on Indonesian Pay TV Platform

(Munich, Germany, Jakarta, Indonesia & Hong Kong, February 4th, 2008)
Programming produced by **earthTV**, which operates the world's largest remote-controlled broadcast camera network launched across Indonesia on the Astro Nusantara pay-TV platform earlier this month.

The **earthTV** programmes, 'World Weather' and 'Motion Time Lapse' will air daily on the Awani channel, while the programme 'Islamic Prayer Times' launches 5 times daily on the Oasis channel.

Riza Primadi, Senior Vice President of News and Current Affairs noted that "**earthTV**'s innovative programming is an ideal enhancement to Astro's in-house channels, Awani and Oasis, and we look forward to developing a significant and lasting partnership with **earthTV**." Astro Nusantara is the leading pay-TV operator in Indonesia with 250,000 subscriber households.

Thomas Hohenacker, **earthTV**'s President added, "**earthTV** is undergoing exceptional growth at this time, and our launch on Astro in Indonesia highlights our focus on growing **earthTV** across the Asia Pacific, and globally, during 2008."

About earthTV

earthTV is part of the TELCAST Media Group, headquartered in Munich, Germany. Utilizing its patented, remote-controlled camera network and technology, **earthTV** is a world leader in the production of daily LIVE programming from destinations around the world.
